

KINESPIN GALVANIZER

RUGGED & DEPENDABLE

- Direct drive for reliable, consistent operation
- Rapid acceleration improves product finish
- Average cycle time less than 10 seconds
- High speed operation (900 RPM) for superior zinc savings
- Mechanical brake for quick stop maximizes throughput
- Detachable drum with safety clamps permits removal of zinc from inside of drum and allows easy access for service
- Flared drum deflects recovered zinc downward for easy clean-up and reuse
- Top hat lid - allows spinning of parts up to 36" in length
- Pneumatic actuated lid to provide an ergonomic environment for the operator

We Provide Application Specific Baskets

**SPINS ZINC OR TIN FROM INDUSTRIAL PARTS
LEAVES A UNIFORM RUST RESISTANT COATING**
