

# 402 & 1100 WASHER / DRYER

## Advantages Of Centrifugal Washing & Drying:

- Programmable multi-function operation for flooding, pre-soaking, spray washing, spin drying, extracting, and coating
- Shorter cycle time
- Single handling insures lot integrity
- Forward and reverse cycles
- Standard or custom process tanks available
- Spin dry with or without heat
- Minimize fluid marks and spotting

## Process Tanks

Standard capture tank capacities are 70 or 120 gallons. Custom sizes, compartments and configurations are available upon request

## Baskets & Fixtures

Standard baskets for most types of bulk parts

Dump Bottom baskets simplifies emptying for bulk parts 3 inches or less in size

## Heater Units

For shorter dry cycle times an electric heater unit is available with a thermostat for over-temperature protection

**We Provide Application Specific Pans, Baskets, Fixtures, and Process Tanks**

**WASHING, DRYING, EXTRACTING, COATING  
OF BULK OR FIXTURED PARTS**
